Thanks, Josh.  
Can you also share with me?

Enesta,

We are finalizing a statement and can send that to the reporter once it's done.

Thanks.

Hi Josh,  
Is this something you can handle?

Hi there,

I'm a reporter with the Houston Chronicle and I wanted to confirm a few things about the BP oil leak from a refinery into Lake Michigan in Indiana today. Do we know at this point how much oil has been spilled into Lake Michigan and overall?

Has the leak stopped? Were there injuries? Have operations at the refinery or the single crude distillation unit resumed?

Do we know at this point what caused the leak?

Is the company working now with regulators/local officials to clean up the spill? Can I get an idea of specific things that are/will go into the clean up? Skimming, booms and whatnot?

Many thanks,

Collin Eaton

Houston Chronicle

Energy reporter
